ERRIN'S VALUE & ROLE

- ❖ We create a bridge between EU policy and local innovation ecosystems
- ❖ We act as a trusted platform for dialogue and collaboration between cities, regions, as well as universities and industry on the ground
- ❖ We highlight the regional dimension in EU R&I policy ensuring that initiatives are designed with and for territories, rather than imposed top-down

TOWARDS THE EU LONG-TERM BUDGET POST-2027

ERRIN – The voice for place-based R&I
2-pager for EU policymakers

20 June 2024

ERRIN - The voice of regions supporting EU decision-makers in place-based R&I policy

ERRIN – European Regions Research and Innovation Network – is a Brussels-based network that supports regional and local stakeholders in developing their innovation ecosystems and enhancing research and innovation (R&I) capacities through collaboration and partnerships.

As the new political cycle begins, European competitiveness, strategic autonomy and addressing the feeling of disconnect between citizens and the EU are among the major issues on the table. Fostering collaboration in R&I is key to helping Europe prosper in the wider geopolitical context. At the same time, maintaining the link with the needs and realities of territories is crucial to ensure optimal impact of policies and keeping people at the centre of the European project.

HOW CAN ERRIN SUPPORT EUROPEAN DECISION MAKERS

ERRIN brings together **120 regions and their research and innovation ecosystems from across 22 European countries**. The network mobilises key R&I stakeholders – public authorities, academia, the private sector and civil society. While facing different challenges, our members invest in research and innovation, local and regional development and contribute to making Europe more competitive. Together, we work bottom-up on European R&I policy and funding and foster experience sharing, mutual learning and collaboration.

ERRIN combines the diverse experiences and expertise at regional and local level where transformations take place. At the same time, we are not only focused on transforming our members' regions but also on connecting their innovation ecosystems to become drivers of change at the European level.

Connected regional R&I ecosystems – key for Europe's competitiveness

ERRIN's 10 key messages to the next MFF

Strengthening research, innovation and competitiveness – insights from 120 regional ecosystems

At this pivotal time for Europe, with the Commission's proposals for the next Multiannual Financial Framework (MFF) and the Framework Programme for Research and Innovation (FP10) getting closer, European Regions Research and Innovation Network (**ERRIN**) is pleased to provide inputs on how the EU can create the right conditions for R&I to thrive for a competitive Europe post-2027.

Even with the strong recognition of the value of innovation ecosystems as essential for competitiveness in key documents like such as the Draghi report, the importance of the place-based dimension of innovation and competitiveness is not covered, leaving a gap in the current policy discussions. However, a thriving European innovation ecosystem requires strong and well-connected place-based innovation ecosystems, essential for enhancing Europe's competitiveness, resilience and strategic autonomy. Without full participation of Europe's diverse regional ecosystems, enhanced competitiveness, strategic autonomy in key technological domains as well as the implementation of EU Green Deal will remain out of reach. A standalone FP10 is necessary to ensure a strong research and innovation dimension in the next MFF, putting innovation at the heart of the European economy and ensuring strong collaboration dimension within EU and between third countries.

The next EU long-term budget must not rely solely on top-down measures focused on a limited number of industrial sectors. Europe also needs to base its measures and investments on technology pull and real demand on the ground. Recognising the diversity of realities and conditions of cities and regions across Europe, and maintaining a close connection with territories, is crucial for ensuring that EU policies and programmes have high impact and keep citizens at the core of the European project.

The following 10 recommendations are based on insights gathered from the 120 regional ecosystems that ERRIN brings together across Europe, based on our comprehensive paper series [Towards the 10th Framework Programme](#).

PROPOSAL FOR A NEW EUROPEAN BUDGET

MFF 2028-2034

2028-2034

€2 TRILLION

**AN AMBITIOUS BUDGET FOR
A STRONGER EUROPE**

- [Proposal of the European Commission 16 July 2025](#)
- [Second proposal adding seven sectoral elements 3 September 2025](#)
- Procedure:
 - Adoption of MFF requires unanimity Members-States and Council, following consent of EU Parliament
 - For revenues require unanimity in Council and approval by Member-States

WHERE ARE WE NOW?

Assessing the proposals for the next long-term budget post 2027

“Focus” on

- National and Regional Partnership Plans
- European Competitiveness Fund
- Horizon Europe

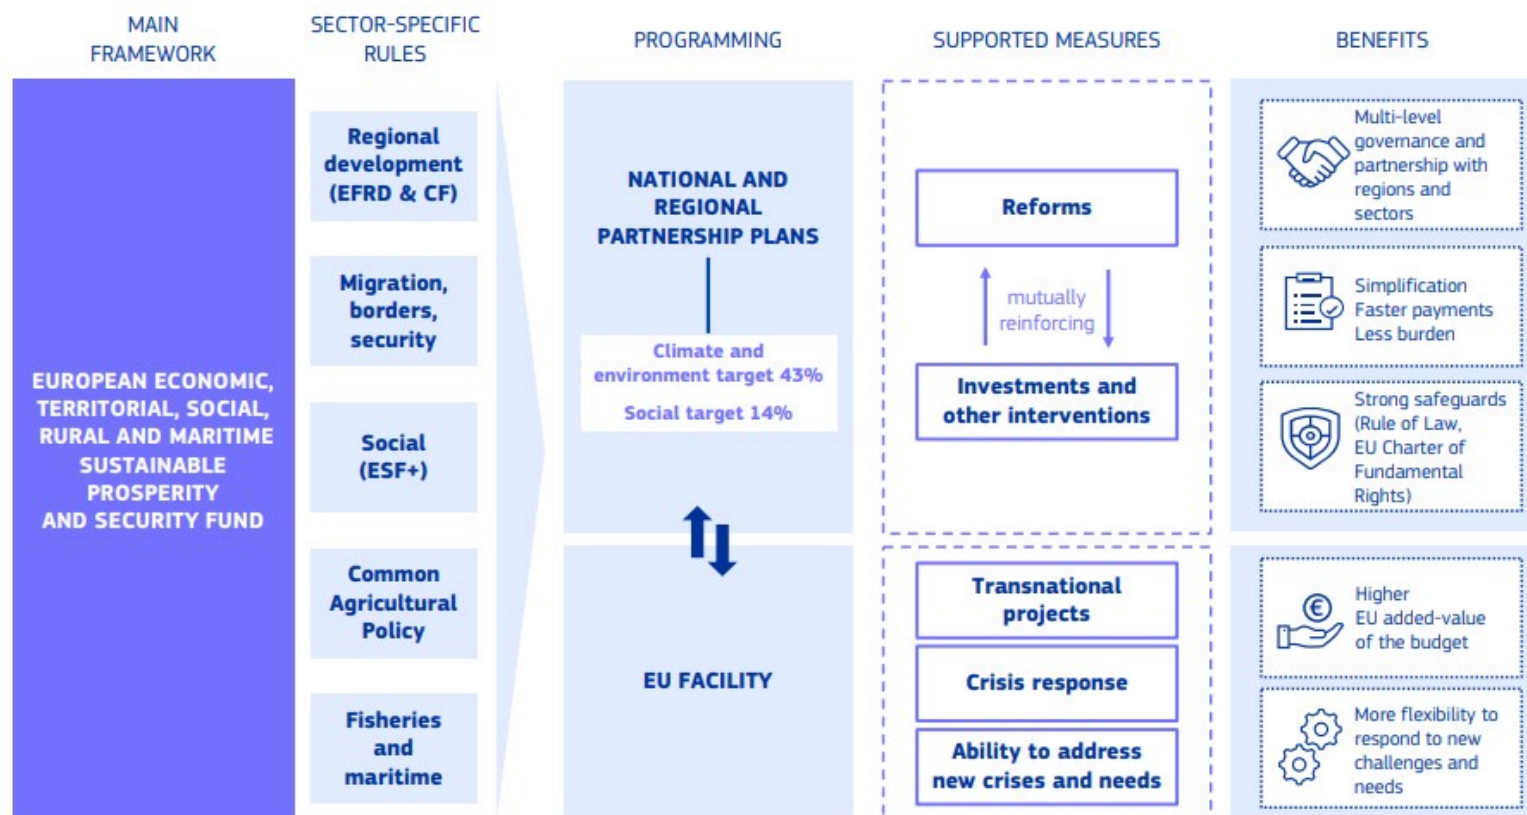

And how they are linked together...

Dedicated events and discussions on the three proposals

National and Regional Partnership Plans

ONE COHERENT STRATEGY

Horizon Europe

With a proposed **€175 billion** budget, the new programme will be based on four pillars.

Pillar I	Pillar II	Pillar III	Pillar IV
EXCELLENT SCIENCE	COMPETITIVENESS AND SOCIETY	INNOVATION	EUROPEAN RESEARCH AREA
€44.079 BILLION	€75.876 BILLION	€38.785 BILLION	€16.262 BILLION
EUROPEAN RESEARCH COUNCIL	COMPETITIVENESS ¹ : 1. Clean Transition and Industrial Decarbonisation 2. Health, Biotech, Agriculture and Bioeconomy 3. Digital leadership 4. Resilience and Security, Defence Industry and Space	EUROPEAN INNOVATION COUNCIL	ERA POLICIES
MARIE SKŁODOWSKA-CURIE ACTIONS		INNOVATION ECOSYSTEMS AND THE KNOWLEDGE TRIANGLE	RESEARCH AND TECHNOLOGY INFRASTRUCTURES
SCIENCE FOR EU POLICIES	SOCIETY: 1. Global societal challenges 2. EU Missions 3. New European Bauhaus Facility		WIDENING PARTICIPATION AND SPREADING EXCELLENCE

EXAMPLE – SMART SPECIALISATION

18 September 2025

ERRIN key messages on the future of S3

Introduction

As the EU enters a critical phase of policy discussions for the post-2027 programming period, ERRIN members have reflected on the experiences of Smart Specialisation Strategies (S3) so far and what is needed to ensure their continued relevance and impact in a new global landscape with priorities increasingly centred around European competitiveness. This report is based on the insights gathered during an interactive session between ERRIN members, where discussions focused on **three key themes crucial for S3 post-2027: the strategic role of Smart Specialisation, governance and stakeholder engagement and interregional collaboration.**

For ERRIN members, Smart Specialisation Strategies have proven to be a valuable and effective tool for strengthening innovation-driven regional development and fostering collaboration within and between R&I ecosystems. The place-based approach of S3 has been key for supporting regions in identifying their unique strengths and opportunities to maximise their R&I potential. The stakeholder engagement in S3 has been effective in many regions, bringing together key R&I actors – businesses, universities, public authorities and civil society – to shape priorities collaboratively, which has strengthened their regional R&I ecosystems. Another key strength of S3 is its potential to bridge multiple policy areas – regional policy, research and innovation policy and industrial policy – and foster synergies between them, which has not yet been fully unleashed in practice. In parallel, cohesion policy should adopt a more innovative approach more broadly, mainstreaming innovation throughout its priorities, beyond key objective one, with Smart Specialisation as an enabler.

“Smart specialisation helps regions select priorities. But little is done to assess the value of those priorities or align them with the EU’s wider goals.”

HOW TO ENGAGE?

JOIN ERRIN'S WORKING GROUPS

Success stories – Navarra

- 2023: ERRIN's matchmaking event - Regional Innovation Valleys (RIV)
 - Early monitoring by ERRIN's Policy WG
 - ERRIN Project facilitation workshop
 - RIV application of Navarra Region was successful
 - Sept. 2024: Start of the ECIV project – European Circular Innovation Valley, budget of €27 million, including cascade funding for local stakeholders.

Project Objectives

Connect Regional Innovation Ecosystems

Establish a European Circular Innovation Valley, linking diverse regions to share expertise, resources, and best practices in circular economy innovation.

Transform Industrial Value Chains

Support the shift from linear to circular value chains by fostering innovation in materials, processes, and business models, ensuring sustainable economic growth.

Bridge the Innovation Gap

Enhance collaboration between innovation leaders and emerging regions, ensuring equitable access to knowledge, funding, and technological advancements.

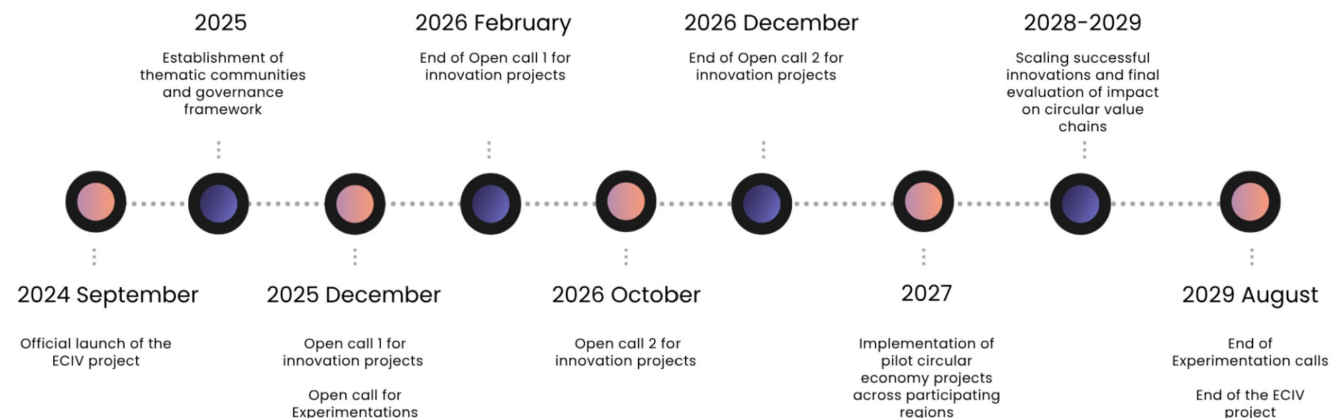

Mobilize Investments for Circular Innovation

Launch open calls and funding programs, channelling €16.3M in public funding and €7M in private investment to support circular economy projects.

Shape Circular Economy Policies and Strategies

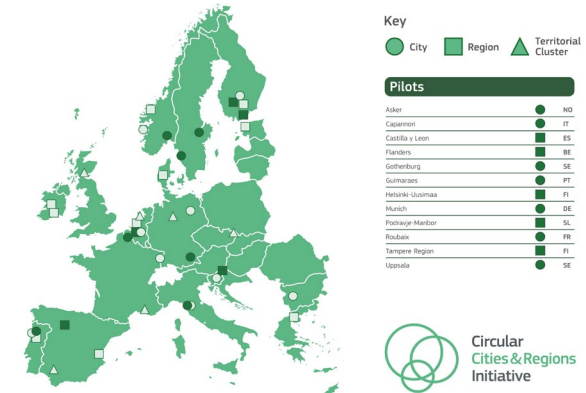

Influence regional and EU-wide policies by developing strategic action plans, mentoring programs, and knowledge-sharing platforms to accelerate circular transformation.

Success stories – Navarra

- ERRIN is leading the **Multi-Stakeholder Dialogues** collecting inputs from local and regional stakeholders on R&I gaps for the European Commission's **Circular Cities and Regions Initiative** (CCRI) 2022-2025
- 2024: **Opportunity to influence future funding calls:** Involvement of Narra Region and ECIV partners in Multi-Stakeholder Dialogues providing direct input for topics for demonstration projects to be funded by Horizon Europe 2026-2027 calls
- 2024-2026: ERRIN – together with EURADA and Climate KIC - is facilitating the implementation of the **Preparatory Action of the European Parliament on Innovation for place-based transformation.**
- 2025: **Navarra is one of 8 pioneering regions in Europe** involved in the **Experimentation Journey for achieving circularity**, with the focus on market creation.

Circular Cities & Regions Initiative – Pilots

ERRINS PROJECT DEVELOPMENT TOOL

- A central hub for ERRIN members to explore, express interest and engage with a variety of funding opportunities. External organisations can engage with ERRIN members through a partner search.
- ERRIN members who have expressed interest in the same calls can directly connect, initiate discussions and explore potential collaboration.
- ERRIN Working Groups and Clusters will conduct follow-up activities through dedicated project development sessions where there is sufficient interest.

Learn how to use the Project Development Tool [here](#).
Start expressing interest via the Project Development Tool [here](#)!

MAKING THE MOST OF YOUR MEMBERSHIP

ERRIN's 2026 Work Plan: provide input for ERRIN's annual member survey by **31 October**

[Sign-up](#) for an ERRIN user account

- ERRIN members' your stakeholders can have an account
- Active ERRIN Daily Update emails and follow the Working Groups, projects and tags in to receive daily emails with the latest news, events and opportunities
- At the same time, [sign up](#) for the ERRIN newsletter

Participate in Working Groups

- Working Group meetings are excellent opportunities to network and learn about EU initiatives, opportunities and what they mean for regions
- Colleagues in Brussels can apply to lead a Working Group

Upload and engage on the ERRIN website

- Make sure your organisation's profile is up-to-date
- Showcase your region by [uploading](#) news, events and opportunities to collaborate with your region to the ERRIN website
- Keep an eye on the [Project Development Tool](#) and [Noticeboard](#) pages for the latest project opportunities
